tisk na folijo/print on city-light foil

Pri raziskavi geometričnih oblik in simbiotičnih korelacij z organskimi strukturami sem izdelala tretjo dimenzijo za obravnavane oblike (Instalacija - leteči objekti).Skozi obdelavo z vsemi mogočimi efekti sem prišla do novih detajlov (pogledov) v mojih fotografijah. Tema projekta je simbolizacija energije v svetu pete dimenzije, ki nastaja v veselju in prostoru brez časa.

In my exploration of geometrical forms in symbiotic corelationship with organic structure I have produced the third dimension of shapes (Instalation -flying object). With all possible options, physical and lighting effects, I discovered some new details (views) in my photos. The theme of the project is to simbolize energy in the world of fifth dimension caused by Universe and space without time.
