

NERDY

**BY ŽAN ČREMOŽNIK**

## A STORY

He was made in Japan in a factory, by famous scientist – Su Jan. That kind of nerd is only one on the whole world. He was a very strange pencil, because he was growing. When he came to school, he was not very smart, and he did not look like a nerd. But when he grew up, he became a nerd. He got nerd glasses and everyone laughed at him. He was very sad, he had no friends. One day he was walking through the very dark forest. He was very frightened. Then he heard a strange voice. And from the behind of the tree came Acid. The pencil wanted to run, but no use. He fell on the floor. Then the Acid said:

“Don’t be scared. I won't hurt you.”

After two hours they became best friends. Acid protected him from mean pencils.
