

# No tricks, just great photography!

*Wedding photography is over-saturated with services which use cheap tricks to get your attention but add nothing to the value of the photography you pay for. We just don't do that. What we believe in are personalized and long-lasting products made with the highest level of artistic and technical understanding of this profession - photography that could easily fit on walls of any serious gallery.*

## Long Lasting Memorabilia

Wedding photographs are not just nice images you share on social media. They are a document of time, people and events, which becomes a part of family heritage long after we're gone. This is why wedding photography calls for a very respectful, well studied and clean approach.

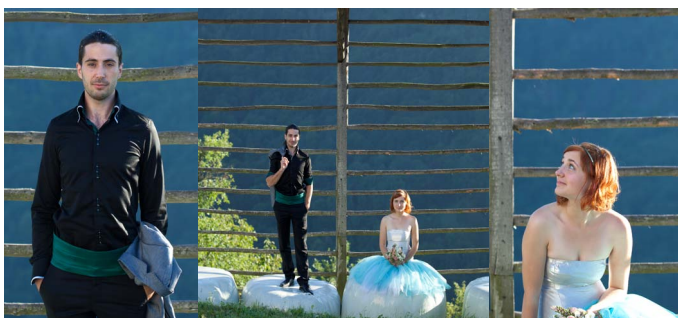

## The Highest Level of Experience

Wedding photography that we offer is a result of many years of work in a fields of photojournalism and fine art photography. We are regular and active visitors of world class festivals of photography (Perpignan, Arles, Bratislava, etc) where our work is judged, developed and scrutinized by the best in the field.

## A Photograph is a Designed Product

But our work does not end here. Taking photographs back in your hands must be a special and "spiritual" experience. This is why we print our photographs on high-quality archival paper and put them into a nice wooden case, which is uniquely designed for each couple.

## Quality is About Responsibility

This event is far too important to be left forgotten with a clumsy attitude. It is a priceless memory that should last through generations – and with our approach, that is exactly what we are trying to do.
