

When your **P**risma™  
**P**rocess requires  
the **B**est in RGA.

**W**hen your process demands the highest sensitivity residual gas analyzer, you need Prisma. With detection limits to parts per billion, Prisma is suitable for trace elemental analysis. Built on 50 years of gas analysis experience with support to match, Prisma's performance meets the demanding requirements of the space shuttle Columbia. It's sure to meet yours:

- 64 measurement channels
- Powerful Windows®-based software interface
- Fast LAN fiber optic communication
- Closed ion source for high pressure gases
- 10 Analog/Digital IO's
- High temperature capabilities for UHV

**PFEIFFER VACUUM**

Finally,  
a leak detector  
built the way  
you want it.

*Leak Detector Requirements*

1. Rugged
2. Simple to operate
3. Indestructible remote
4. Easy to maintain
5. Made for my application

**The NEW QualyTest™ Helium Leak Detector.**

- Steel construction plus convenient work surface
- On-screen prompts – simple as a bank ATM
- Remote designed for impact resistance
- Components accessible within 3 minutes
- Many versions to choose from – dry, general vacuum or custom-configured
