

JSM-7800F
Field Emission Scanning Electron Microscope

JSM-7800F

FEG Scanning Electron Microscope

Featuring our latest Super Hybrid Lens
Search and observe specimens with ease, and with zero rotation.

Semi in-lens
Giving you better resolution at the same working distance.

Field free objective lens
Improved performance for imaging magnetic materials.

Superior low kV resolution
Producing better images of insulating materials.

Gentle Beam mode
Extremely high resolution at very low kV

Optional Electron Detectors
Available with four different Electron Detectors, all operating simultaneously.

50 YEARS OF LEAK DETECTION

Experience makes sense!

Pfeiffer Vacuum is the supplier with the widest range of leak detectors on the market. We provide solutions for applications using helium and hydrogen as tracer gas.

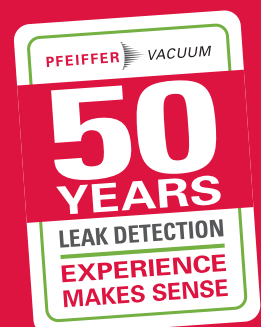

From portable devices to complex high end leak detectors – we always offer the optimum solution to detect leakages in many different industrial sectors.

Competence, quality and service from a single source.
