

Multi Beam System

Scientific / Metrology Instrument

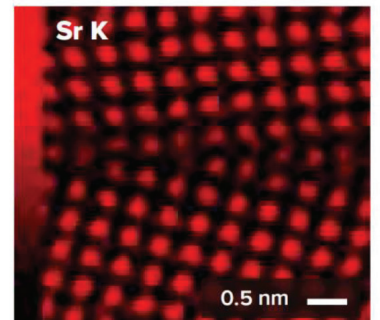

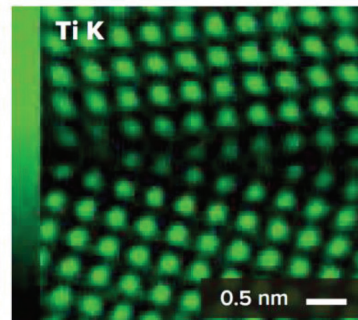

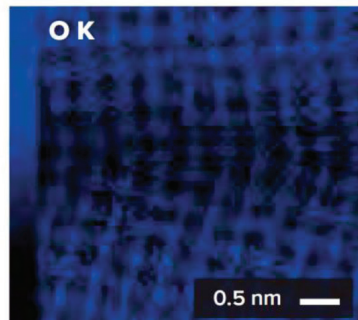

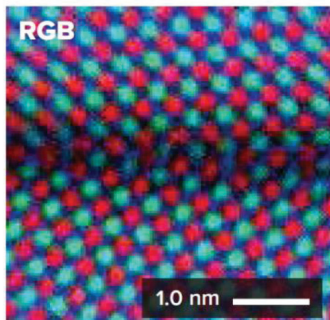

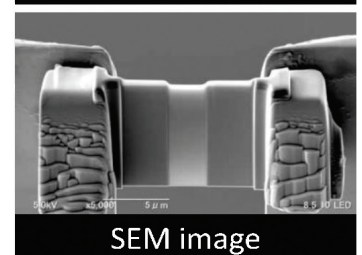

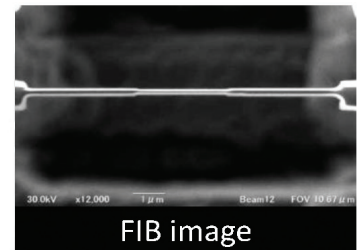

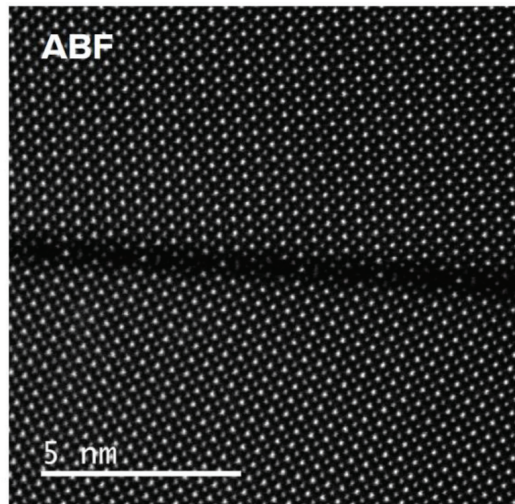

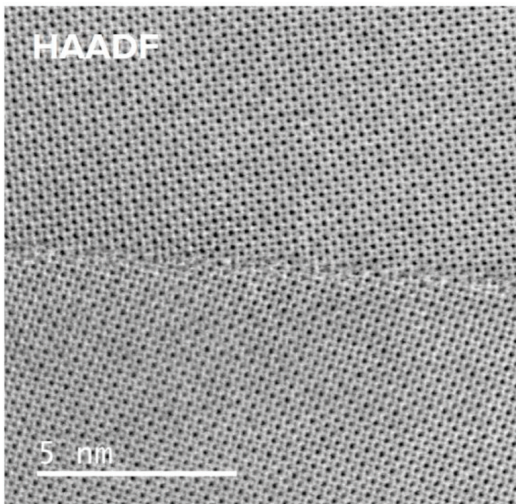

JIB-4700F

JIB-4700F is a new generation multi-beam FIB system.

The high performance FIB column delivers excellent low voltage performance.

The new FIB system enables the creation of high quality TEM lamella.

Sample: SrTiO₃

TEM : JEM-ARM200F NEOARM

PRISMAPRO®

**The latest generation of compact mass spectrometers.
Modular design. Powerful software. Low detection limit.**

- Optimum adaptability due to modular design
- A variety of interfaces make for simple systems integration
- High measurement speed, stability and high resolution
- Two filaments mean maximum up-time
- Lowest detectable partial pressure $3 \cdot 10^{-15}$ hPa (mbar)
